

Foundation for A Course in MIRACLES®

Digital Download

Info & Instructions

PLEASE NOTE

Digital downloads are not returnable, so please make sure you have the correct product in your cart before purchasing. The Foundation cannot be responsible for any inadvertent duplicate or unintended purchases.

GETTING YOUR DOWNLOAD

Immediately upon payment, you'll be taken to a confirmation page within the online store where you can download your file(s) right away. You will also receive two emails — one is your receipt, and the other contains the download link. If you don't see these within a few minutes, check your SPAM and/or JUNK folders.

Gmail users: Gmail's spam filtering has become more aggressive recently, and the SPAM folder isn't always visible by default — you may need to search for it or adjust your settings to display it.

OPENING YOUR EPUB

Choose the option for your device:

- **Windows** — install Calibre (free) — the simplest all-in-one way to open and manage ePub files.
- **Mac** — double-click the file, or drag it into Apple Books, which is pre-installed.
- **iPhone / iPad** — tap the downloaded file and choose “Open in Books” to add it to Apple Books.
- **Android** — open Google Play Books (pre-installed) and upload the file to your library.

OPENING YOUR ZIPPED MP3 OR MP4 FILES

Our audio (MP3) and video (MP4) products are delivered as a *zipped* file (a single compressed file ending in **.zip**) containing all the individual tracks or videos. You'll need to *unzip* (extract) it before the files inside are playable. Here's how, by device:

Windows

1. Locate the downloaded **.zip** file, usually in your Downloads folder.
2. Right-click the file and choose **Extract All....**
3. Choose a destination folder and click **Extract**. Your MP3s or MP4s will appear in that folder, ready to play.

Mac

1. Locate the downloaded **.zip** file, usually in your Downloads folder.
2. Double-click the file. macOS will automatically unzip it into a new folder in the same location.
3. Open that folder to find your MP3s or MP4s, ready to play.

iPhone / iPad

1. Open the *Files* app and locate the downloaded **.zip** file, usually in *Downloads*.
2. Tap the **.zip** file. iOS will automatically extract it into a new folder in the same location — no extra app needed.
3. Open that folder to find your MP3s or MP4s. Tap a file to play it, or share it to the Music, Files, or video app of your choice.

Android / Android Tablets

1. Locate the downloaded **.zip** file, usually in your Downloads folder, using your device's Files app (*Files by Google* is pre-installed on most Android phones and tablets; some devices call it *My Files*).
2. Tap the **.zip** file, then tap **Extract** when prompted.
3. Open the newly extracted folder to find your MP3s or MP4s, ready to play in your music or video app of choice.

Kindle Fire Tablets

1. Kindle Fire tablets don't include a built-in unzip tool, so install a free file manager from the Amazon Appstore — **File Commander** is a good, well-reviewed option.
2. Open the app, locate the downloaded **.zip** file (usually in *Downloads*), and tap it.
3. Choose **Extract** (or **Unzip**) and select a destination. Open the extracted folder to find your MP3s or MP4s, ready to play.

DOWNLOAD STEPS

1. After purchasing, you'll receive an email with a download link.
2. Click the link to download the file to your computer, phone, or tablet.
3. If your download is a zipped MP3 or MP4 file, follow the unzip steps above for your device. ePub files can be opened directly with the app for your device, listed above.

Still stuck? The Foundation can't provide support for third-party apps or devices, but our team is happy to help with anything related to your order. Visit our [Contact Us](#) page or email us directly at custserv@facim.org.
